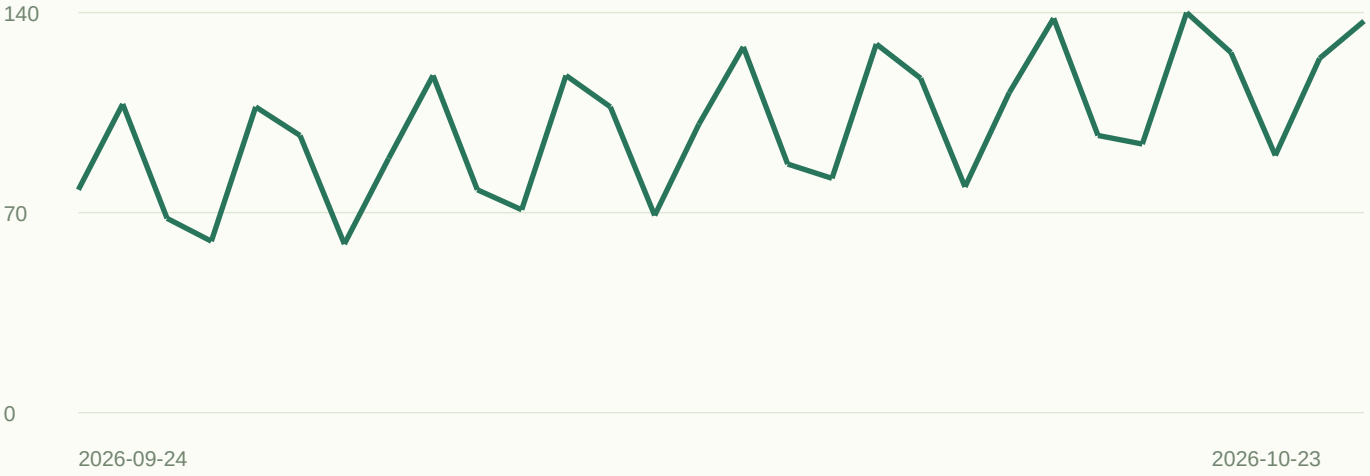
SYNTHETIC DEMO - NOT REAL ADOPTION

Every signal, a next move.

2026-09-24 to 2026-10-23 / Asia/Kolkata

Active participants	Students marking Applied	Active time estimate
829	**328**	**289.9h**

Activity over time / daily active participants



Decisions this report supports

Prioritize onboarding friction, repeat use and application progress. Pair recorded behavior with student feedback. Apply opens and user-confirmed Applied actions are distinct signals.

Signal	Current	Context / prior
Active participants	829	680
Students marking Applied	328	243
Onboarding completion	81.4%	New unfinished profiles
Checked application records	548	624

Primary outcome: students recording applications with no detected requirement conflict or uncertainty. Return and active time are diagnostic proxies, not evidence of hiring outcomes or time saved.

SYNTHETIC DEMO - NOT REAL ADOPTION

Retention & student momentum

2026-09-24 to 2026-10-23 / Asia/Kolkata

Day-1 return

62.1%

468 / 754 mature participants

Day-7 return

49.7%

317 / 638 mature participants

Day-30 return

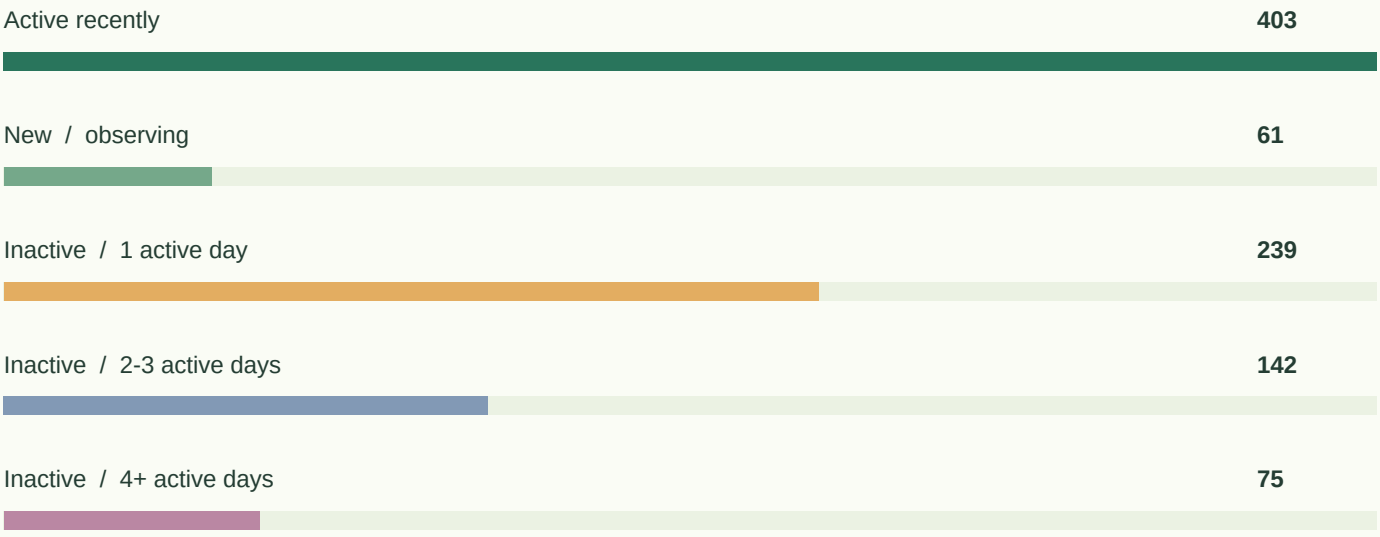
N/A

0 / 0 mature participants

Return cohorts / rolling observation weeks

First week	People	W0	W1	W2	W3	W4
2026-10-19	166	Observing	Observing	Observing	Observing	Observing
2026-10-12	166	Observing	Observing	Observing	Observing	Observing
2026-10-05	166	100.0%	Observing	Observing	Observing	Observing
2026-09-28	166	100.0%	57.8%	Observing	Observing	Observing
2026-09-21	165	100.0%	58.2%	46.1%	Observing	Observing

Inactivity by depth of observed use



Inactivity means seven days without recorded activity. Groups use observed active days, not sessions. Cohorts are restricted to retained first-observed history. A missing cohort cell has not matured; it is not zero retention.

SYNTHETIC DEMO - NOT REAL ADOPTION

Feature adoption & engagement

2026-09-24 to 2026-10-23 / Asia/Kolkata

Measured participants	Median active time / person	Total estimated active time
721	**24m**	**289.9h**

Feature adoption / unique participants

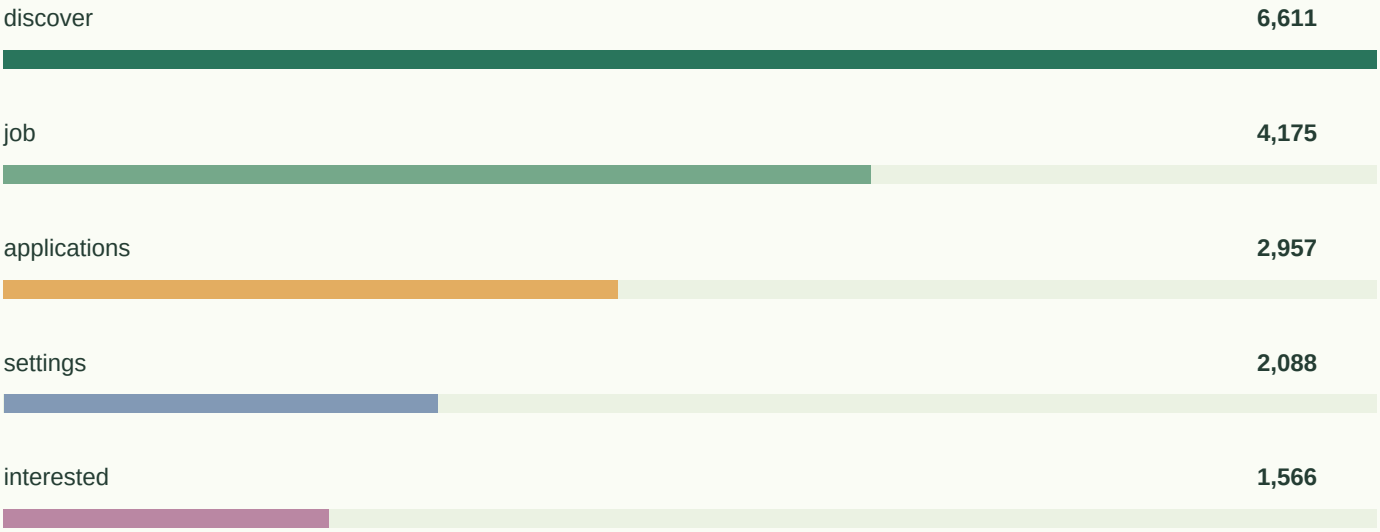
Feature	Users	Adoption	Actions
Job detail views	742	89.5%	4836
Role filters	612	73.8%	2218
Saved jobs	583	70.3%	1937
Scout conversations	391	47.2%	1724
Apply link opens	474	57.2%	1452
Resume/JD checks	286	34.5%	812
Marked Applied	328	39.6%	624
Resume preparations	214	25.8%	517
Progress updates	173	20.9%	367
Resume uploads	231	27.9%	294

SYNTHETIC DEMO - NOT REAL ADOPTION

Feature engagement / active time

2026-09-24 to 2026-10-23 / Asia/Kolkata

Active time by workspace section / minutes



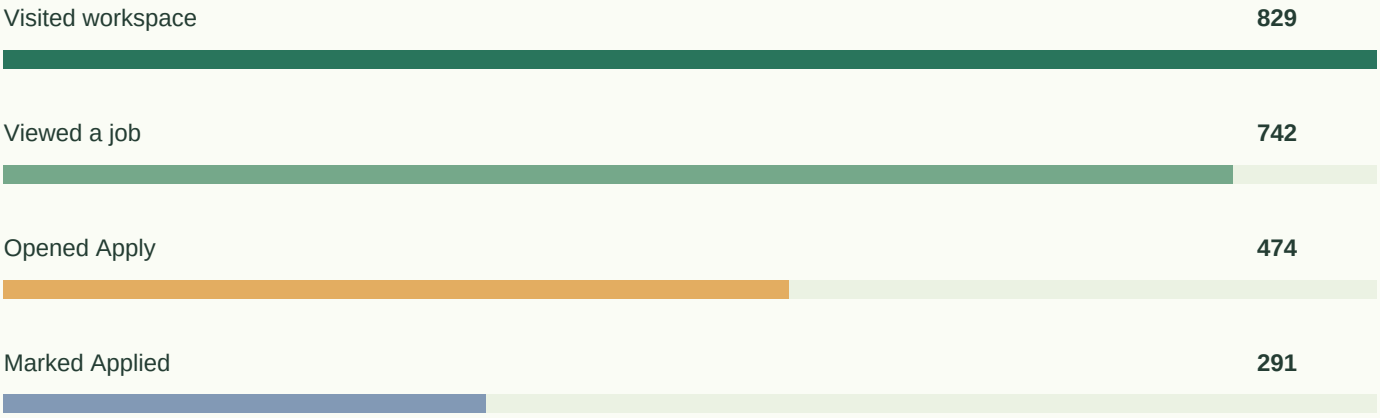
Synthetic demonstration of visible, focused, recently used time. Not measured campus activity or time saved.

SYNTHETIC DEMO - NOT REAL ADOPTION

Application journey

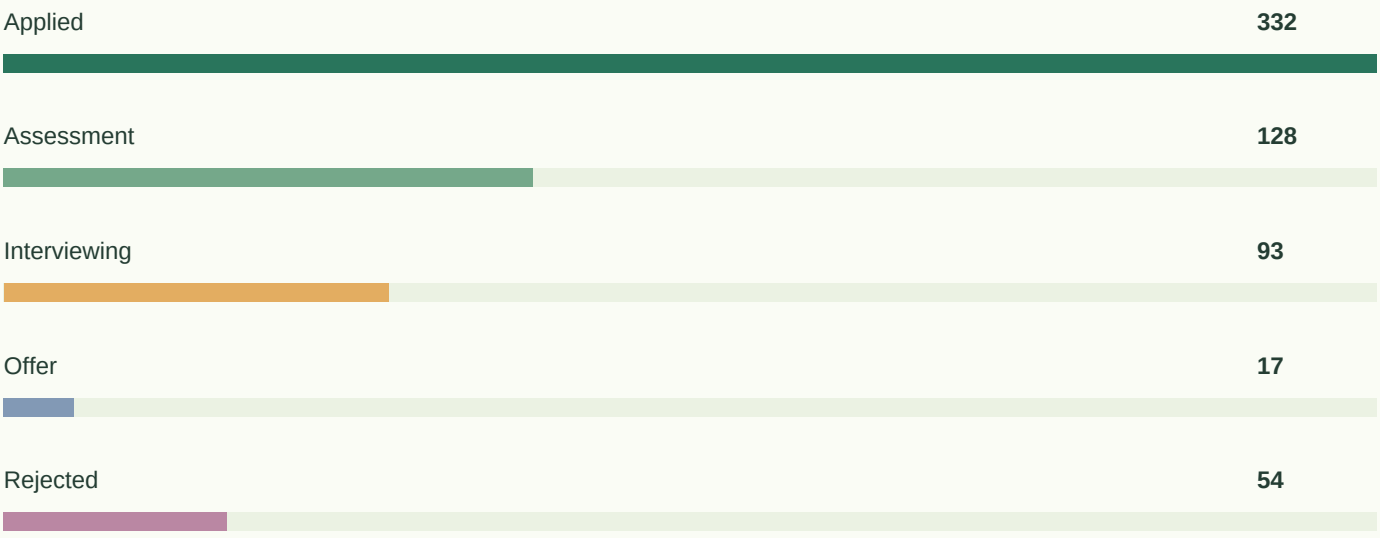
2026-09-24 to 2026-10-23 / Asia/Kolkata

Ordered participant progression



Steps occur in order within the selected period and may concern different jobs. These events do not establish employer-verified application conversion. Users can mark Applied without an observed preceding click; such activity is excluded from the ordered journey.

Tracked application stages / records updated in this period



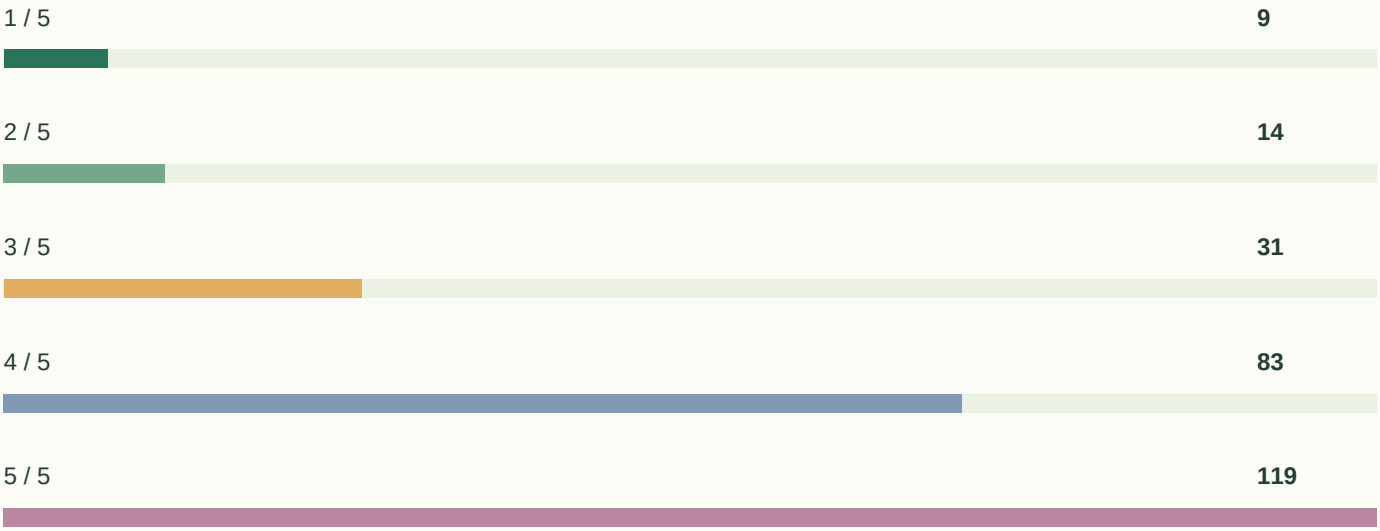
SYNTHETIC DEMO - NOT REAL ADOPTION

Feedback & the improvement loop

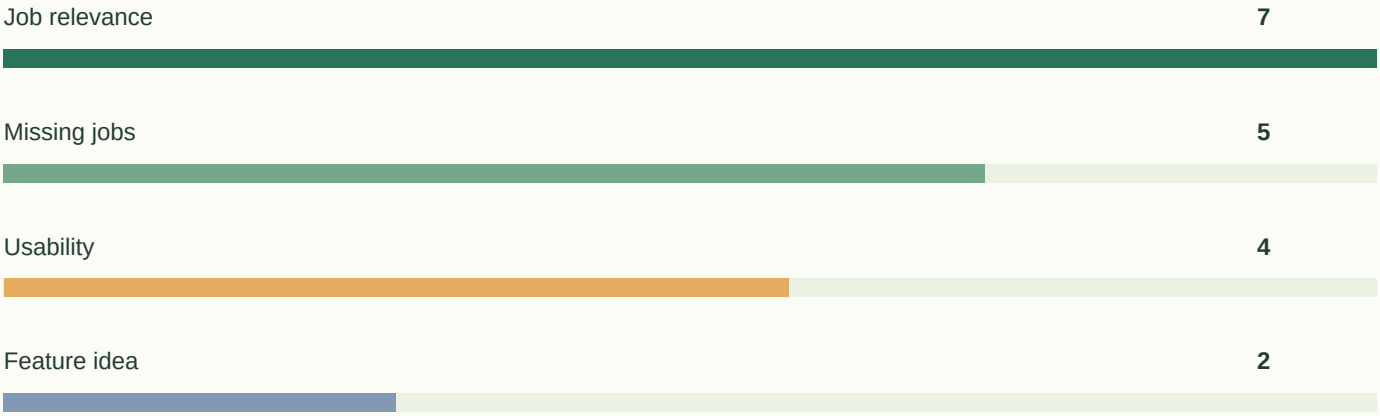
2026-09-24 to 2026-10-23 / Asia/Kolkata

Experience / voluntary ratings	Open feedback / all retained	First help reply / average
4.1/5	**18**	**6.4h**

Rating distribution



Open feedback categories / selected period



Ratings are voluntary, may include repeat respondents and include people who disabled analytics. They measure NextRole experience, not the employer hiring process. Private messages, identities and replies are excluded from this report.

SYNTHETIC DEMO - NOT REAL ADOPTION

Operations & reliability

2026-09-24 to 2026-10-23 / Asia/Kolkata

Synthetic demo contains no live operational data. Switch to Live analytics to inspect actual source health, delivery backlog and retained records.

Hosting CPU, request costs, database read/write usage, backups and real load capacity need provider-side monitoring. This report does not certify campus-scale readiness.

SYNTHETIC DEMO - NOT REAL ADOPTION

Measurement notes

2026-09-24 to 2026-10-23 / Asia/Kolkata

SYNTHETIC DEMO: every usage and campus-scale count in this report is illustrative. It is not evidence of real students, activity, adoption or product impact.

Window: 2026-09-24 through 2026-10-23 (IST). Generated: 2026-10-23T10:29:04.622Z. Definitions: 2026-10-admin-v1. Tracking began: 2026-07-26T03:30:00.000Z.

Stored profiles, observed analytics participants and opt-outs are different populations. Host actions are excluded. Optional first-party telemetry can be missed. Disabling analytics or clearing a workspace removes that participant from historical aggregates.

Return: activity exactly 1, 7 or 30 calendar days after first observation, divided by participants with sufficient follow-up. Weekly cohorts use rolling seven-day windows and hide immature cells. Initial visits are included in Week 0. No causal inference is made.

Synthetic demonstration of visible, focused, recently used time. Not measured campus activity or time saved.

Events and daily time aggregates are retained for 90 days. The minute deduplication ledger expires after 48 hours. Previous-period comparisons are suppressed when tracking or retention coverage is incomplete. Application stages are current user-maintained snapshots updated in the selected period.

Voluntary support and ratings have a separate population. Feedback categories are selected by students. Response timing averages include only requests with the corresponding timestamp. Live operation counts do not measure billed hosting usage.
